

**3F**

# DS5

## Decontaminant Additive

Solvent Free

Fluorine Free

### PHYSICAL DATA ●

Appearance / Colour	Yellow liquid
Concentration of use	5%
Specific Gravity at 20°C (Kg/dm <sup>3</sup> )	1.10
Viscosity at 20°C (cStokes)	15
Freezing point	-10°C
Ph at 20°C	9
Sediment after ageing	<0.1%
Surface tension at 5% (mN/m)	25

### DS5 ● SF

### PERFORMANCE & WARRANTY ●

DS5 is a heavy-duty concentrate designed to remove all contaminant particles on water resistant surfaces. It is effective on solid particles, grease, oil, and solvents.

DS5 should be used with any high-pressure equipment; therefore we recommend using it with FAS, which offer the perfect combination to ensure fast and full removal of any stain.

After application, leave the product in contact with the contaminated material / area for 2-5 minutes. Then use clean water to rinse.

DS5 can be used with soft, hard water or seawater.

DS5 has a 5 years warranty in its original packaging and at storage temperatures 0°C / +60°C.
