

More than a simple fire detector,
Detex saves lives

**80 % of the deaths are provoked
by suffocating smokes**

- > **1** domestic fire every 2 minutes
- > Double the number in 1990
- > **300** deaths per year / **3,000** seriously injured
- > **80%** of deaths caused by asphyxiation
- > **2nd** cause of accidental death among children under the age of **5**
- > It takes just **6** minutes for a room to catch fire!
- > Average response time for the fire services : **18** minutes
- > **75%** of fires break out at night

Fight against toxic fumes

DETEX, the world's first autonomous ductless smoke detector and extractor

- Sucks up and traps the soot in the smoke to prevent intoxication
- Filters out the carbon dioxide that makes the air 31% more breathable
- Reduces carbon monoxide by 6%
- Lowers room temperature by 30% and improves visibility
- Operates autonomously for a minimum of 30 minutes after the power supply has been lost
- Integrated NF - EN 14604 compliant smoke alarm
- Extraction capacity of 192m³ / hour, efficient on particles 0.3 microns in size
- Limits the permanent damage to your belongings due to soot
- For total safety, fit 1 Detex on each floor
