TRAINING MANIKINS FOR THE MILITARY

RUTH LEE

FOR PROFESSIONALS WHO SAVE LIVES

MANIKINS FOR THE MILITARY FOR PROFESSIONALS WHO SAVE LIVES

Ruth Lee manikins are used by rescue professionals across the world. Designed initially for the Fire & Rescue Service, they are robust enough to stand up to the rigours of military exercises and are weighted proportionately to be anatomically correct, for more realistic training.

We are confident you won't find a more durable manikin on the market and with a full range of dummies, designed for different training scenarios, we are sure we can provide you with the perfect training partner!

DUTY RANGE

Our best selling manikin. It is ideal for a range of training scenarios including: Confined Space, Urban Search and Rescue (USAR), Road Traffic Collision (RTC), CBRN and general handling exercises. These are tough and durable manikins!

MAN OVERBOARD

It is vital that effective MOB drills are conducted frequently with crew members on all vessels - these manikins have proven to be a vital tool in achieving that. This manikin can float at any angle between the vertical and horizontal by simply moving the foam pieces between the chest pockets and the legs, a process which takes seconds.

MASS CASUALTY

It seems inevitable that during training or live action, your team will face a situation where there has been mass casualties. With terrorism becoming an increased threat across the world, these light-weight, cost effective manikins allow you to create a scenario where there is lots of bodies which need to be seen, but not necessarily reCOVERED..

RLMASS	ADULT	4Kg	1.8m	NA

MULTI TRAUMA

One of our more interesting manikins that can be used to simulate impalements or a partial or total loss of limb. It is an excellent choice for USAR or RTC (Road Traffic Collision) training and helps to promote proper casualty care - if you handle him incorrectly, he could lose an arm!

PRISONER SECURITY

Used by CERT (Correctional Emergency Response Teams) worldwide for practising cell extractions and restraint techniques.

With a reinforced neck, this manikin can also be used to simulate a suicide through hanging to practise body recovery and evidence preservation techniques.

RLPS50	50 Kg ADULT	50Kg	1.8m	NA

SEARCH AND RESCUE

Made in exactly the same way as the popular Man Overboard manikin, the only difference is the colour. The Search & Rescue model is deliberately designed to be difficult to see in the water to enable crews to develop the 'search' element of their Search & Rescue training, making this model particularly suitable for Police Forces or inland water rescue teams.
