LIFEGUARD TRAINING MANIKINS FOR PROFESSIONALS WHO SAVE LIVES

Ruth Lee Ltd are market leaders in the design and manufacture of training manikins, with more than 60 years' experience.

Our range of Water Rescue manikins have been designed in consultation with experts in the industry, including the Royal Life Saving Society (RLSS), Royal Navy, Royal National Lifeboat Institution (RNLI) and Surf Life Saving Australia.

We are confident these are the very best water rescue manikins available on the market.

POOL RESCUE MANIKIN

This manikin has been designed in consultation with the Royal Life Saving Society UK (RLSS) and is a revolutionary new product which allows trainee lifeguards to learn vital skills.

Once thrown into the pool, the manikin quickly sinks beneath the surface and lifeguards can train to retrieve it from the bottom, tow it to the side using a variety of towing techniques, and perfect their lifting techniques. All using one dummy, instead of switching between plastic torsos and live 'volunteers'!

SURF RESCUE MANIKIN

This dummy was developed with the co-operation of Surf Life Saving Australia as a water rescue dummy for IRB Racing, IRB driver training and Tube Rescue practice.

During the testing the dummy was also found to be suitable for Jet Ski rescue training and other general rescue scenarios.

Its arms are held aloft to make it easier to spot and then drag on board a moving boat. It is the perfect tool for perfecting speed and technique in IRB racing as there is no danger to the dummy, compared to using live volunteers.

SPEAK TO THE EXPERTS

We would be pleased to offer advice on our range of water rescue training products.

MAN OVERBOARD MANIKIN

Our Man Overboard manikin is one of our most popular models. Available in a brightly coloured high-viz fabric, it is easily spotted in open water and comes in adult, youth, toddler and baby sizes.

Many Leisure Centres use the baby manikin for teaching children floating techniques and it is a useful tool for teaching young people about water safety.
