Weight	450 Kg
Dimensions	LxWxH 230x120x143

USE ●

FIRE QUAD is an attack vehicle designed to combat forest fires or other fire emergency. It proves very efficient in areas of difficult access.

FIRE FLASH allows an immediate attack to tackle forest fires. It is recommended to use the foam additive to enhance its extinguishing power by ten folds.

FIRE QUAD is very robust and versatile, and made to stand the worst weather conditions. It is protected with bumpers all around the Quad, special tires, and is fitted with a frame to install FIRE FLASH. It can tow up to 500 Kilos. The brakes are hydraulic at the front and discs at the rear. The radiator has its own fan. It is fully equipped with lights, horn and mirrors. The engine starts with key.

On board equipment features LED display for engine temperature, gearbox position, fuel gauge, 2WD/4WD switch, Cigarette charger.

FIRE QUAD can carry two people.

FIRE QUAD is warranted 1 year.
